PROCEEDINGS OF SPIE

Structural Health Monitoring and Inspection of Advanced Materials, Aerospace, and Civil Infrastructure 2015

Peter J. Shull
Editor

9–12 March 2015
San Diego, California, United States

Sponsored by
SPIE

Cosponsored by
American Society of Mechanical Engineers (United States)

Cooperating Organizations
Intelligent Materials Forum (Japan)
Jet Propulsion Laboratory (United States)
National Science Foundation (United States)

Published by
SPIE

Volume 9437

Proceedings of SPIE 0277-786X, V. 9437

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Structural Health Monitoring and Inspection of Advanced Materials, Aerospace, and Civil Infrastructure 2015, edited by Peter J. Shull, Proc. of SPIE Vol. 9437, 943701 · © 2015 SPIE · CCC code: 0277-786X/15/$18 · doi: 10.1117/12.2195771

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

ix *Authors*
xi *Conference Committee*

SESSION 1 SHM/NDE FOR COMPOSITE MATERIALS I

9437 03 **Characterization of complex materials with elastic discontinuities using scanning acoustic microscopy** [9437-2]

9437 04 **FRP/steel composite damage acoustic emission monitoring and analysis** [9437-3]

SESSION 2 SHM/NDE FOR COMPOSITE MATERIALS II

9437 05 **Experimental evaluation on the effectiveness of acoustic-laser technique towards the FRP-bonded concrete system** [9437-4]

9437 06 **Non-destructive testing techniques based on nonlinear methods for assessment of debonding in single lap joints** [9437-5]

9437 09 **Modeling of thermal wave propagation in damaged composites with internal source** [9437-8]

SESSION 3 SHM/NDE FOR COMPOSITE MATERIALS III

9437 0A **The exploration study of fire damage to concrete specimen using x-ray computed tomography** [9437-9]

9437 0C **Damage criticality and inspection concerns of composite-metallic aircraft structures under blunt impact** [9437-11]

9437 0D **Design, application, and validation of embedded ultrasonic sensors within composite materials** [9437-12]

9437 0E **A supervised outlier analysis for risk assessment in composite wing structures** [9437-14]

SESSION 4 BRIDGE INSPECTION AND MONITORING USING SHM/NDE TECHNIQUES I

9437 0I **Detection of delamination in concrete slabs combining infrared thermography and impact echo techniques: a comparative experimental study** [9437-18]

9437 0J **Boundary condition identification for a grid model by experimental and numerical dynamic analysis** [9437-19]

9437 0K **Development and evaluation of a long range image-based monitoring system for civil engineering structures** [9437-20]

SESSION 5 BRIDGE INSPECTION AND MONITORING USING SHM/NDE TECHNIQUES II

9437 0M **Non-contact main cable NDE technique for suspension bridge using magnetic flux-based B-H loop measurements** [9437-22]

9437 0N **Automated outlier detection framework for identifying damage states in multi-girder steel bridges using long-term wireless monitoring data** [9437-23]

9437 0O **Monitoring of transverse displacement of reinforced concrete beams under flexural loading with embedded arrays of optical fibers** [9437-24]

9437 0P **Concrete bridge deck early problem detection and mitigation using robotics** [9437-25]

SESSION 6 PIEZOELECTRIC SENSING SHM/NDE TECHNOLOGIES I

9437 0Q **Bearing fault component identification using information gain and machine learning algorithms** [9437-96]

9437 0R **High piezoelectric properties of cement piezoelectric composites containing kaolin** [9437-27]

9437 0S **Adhesive disbond detection using piezoelectric wafer active sensors** [9437-28]

9437 0T **Ultrasonic measurement and monitoring of loads in bolts used in structural joints** [9437-29]

9437 0U **Nonlinear acoustics for practical applications** [9437-30]

9437 0V **Fibre optic sensors for load-displacement measurements and comparisons to piezo sensor based electromechanical admittance signatures** [9437-47]

SESSION 7 MODELING AND SIMULATION TECHNIQUES FOR SHM/NDE I

9437 0W **Simulating the x-ray image contrast to setup techniques with desired flaw detectability** [9437-31]

9437 0X **Infrared contrast data analysis method for quantitative measurement and monitoring in flash infrared thermography** [9437-32]

SESSION 8 MODELING AND SIMULATION TECHNIQUES FOR SHM/NDE II

9437 0Y **Application of firefly algorithm to the dynamic model updating problem** [9437-33]

9437 10 **Damage localization for multi-story buildings focusing on shift in the center of rigidity using an adaptive extended Kalman filter** [9437-35]

9437 11 **Finite element analysis for the damage detection of light pole structures** [9437-36]

SESSION 9 MODELING AND SIMULATION TECHNIQUES FOR SHM/NDE III

9437 13 **Using a general purpose finite element approach to attain higher fidelity rotordynamic analyses** [9437-38]

9437 14 **Nonlinear dynamics and health monitoring of 6-DOF breathing cracked Jeffcott rotor** [9437-39]

9437 15 **Finite element modeling, numerical calculation, and experimental researches for evaluating the seismic stability of the power units of Ukrainian nuclear power plants** [9437-40]

9437 16 **Nonlinear structural finite element model updating and uncertainty quantification** [9437-41]

SESSION 10 VIBRATION-BASED SHM/NDE I

9437 17 **A novel approach for detection of anomalies using measurement data of the Ironton-Russell bridge** [9437-42]

9437 1A **Damage assessment of the truss system with uncertainty using frequency response function based damage identification method** [9437-45]

9437 1B **Mass and stiffness estimation using mobile devices for structural health monitoring** [9437-46]

9437 1C **Time frequency analyses of vibrations of wind turbine towers** [9437-48]

SESSION 11 GUIDED WAVE I

9437 1E **Separation of Lamb waves modes using polarization filter of 3D laser measured signals** [9437-50]

9437 1F **Corrosion damage estimation in multi-wire steel strands using guided ultrasonic waves** [9437-51]

SESSION 12A SHM/NDE FOR CIVIL INFRASTRUCTURE I

9437 1H **Identification and prioritization of rail squat defects in the field using rail magnetisation technology** [9437-53]

9437 1I **Development of a low-cost cableless geophone and its application in a micro-seismic survey at an abandoned underground coal mine** [9437-54]

9437 1J **Health state evaluation of shield tunnel SHM using fuzzy cluster method** [9437-55]

SESSION 12B GUIDED WAVE II

9437 1K **Non-destructive evaluation of coating thickness using guided waves** [9437-56]

9437 1L **The study of damage identification based on compressive sampling** [9437-57]

9437 1M **Numerical and experimental demonstration of shear stress measurement at thick steel plates using acoustoelasticity** [9437-58]

9437 1N **Temperature variation effects on sparse representation of guided-waves for damage diagnosis in pipelines** [9437-59]

SESSION 13A SHM/NDE FOR CIVIL INFRASTRUCTURE II

9437 1O **Extracting full-field dynamic strain response of a rotating wind turbine using photogrammetry** [9437-60]

9437 1P **An acoustic-array based structural health monitoring technique for wind turbine blades** [9437-61]

9437 1S **Temperature numerical analysis of a large rigid-continuous concrete bridge** [9437-64]

SESSION 13B GUIDED WAVE III

9437 1U **Multifrequency and multimodal sparse reconstruction in Lamb wave based structural health monitoring** [9437-65]

9437 1V **Modeling ultrasonic NDE and guided wave based structural health monitoring** [9437-66]

9437 1W **Nonlinear feature extraction methods for removing temperature effects in multi-mode guided-waves in pipes** [9437-67]

9437 1X **Effects of damage location and size on sparse representation of guided-waves for damage diagnosis of pipelines under varying temperature** [9437-68]

9437 1Y **Experimental validation of analytical model for Lamb wave interaction with geometric discontinuity** [9437-69]

SESSION 14A ROADWAY AND PAVEMENT INSPECTION AND MONITORING: SHM/NDE TECHNOLOGIES

9437 1Z **A Hessian-based methodology for automatic surface crack detection and classification from pavement images** [9437-70]

9437 20 **Monitoring of pre-release cracks in prestressed concrete using fiber optic sensors (SPIE/ASME Best Student Paper Award)** [9437-71]

9437 21 **Deterioration modeling for condition assessment of flexible pavements considering extreme weather events** [9437-72]

9437 22 **Conductive paint-filled cement paste sensor for accelerated percolation** [9437-73]

SESSION 14B RADAR AND MICROWAVE NDE TECHNOLOGIES

9437 24 **Forward and inverse dielectric modeling of oven-dried cement paste specimens in the frequency range of 1.02 GHz to 4.50 GHz** [9437-75]

9437 25 **OFDM and compressive sensing based GPR imaging using SAR focusing algorithm** [9437-76]

9437 26 **Sand moisture assessment using instantaneous phase information in ground penetrating radar data** [9437-77]

POSTER SESSION

9437 28 **Monitoring the integrity of massive aluminum structures using PZT transducers and the technique of impedance** [9437-26]

9437 2A **Quick seismic intensity map investigation and evaluation based on cloud monitoring method using smart mobile phone** [9437-81]

9437 2B **Rapid condition assessment of structural condition after a blast using state-space identification** [9437-82]

9437 2E **Review and study of physics driven pitting corrosion modeling in 2024-T3 aluminum alloys** [9437-85]

9437 2H **Considerations for ultrasonic testing application for on-orbit NDE** [9437-88]

9437 2J **The study of compressive sampling in ultrasonic computerized tomography** [9437-90]

9437 2K **Crack visualization of metallic structures in wide area using time-domain reflectometry with two-dimensional microstrip lines** [9437-91]

9437 2L **Damage detection and quantification in a structural model under seismic excitation using time-frequency analysis** [9437-92]

9437 2O **Artificial intelligence and signal processing for infrastructure assessment** [9437-95]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Victor Giurgiutiu, University of South Carolina (United States)
Christopher S. Lynch, University of California, Los Angeles (United States)

Symposium Co-chairs

Jayanth N. Kudva, NextGen Aeronautics, Inc. (United States)
Theodoros E. Matikas, University of Ioannina (Greece)

Conference Chair

Peter J. Shull, The Pennsylvania State University (United States)

Conference Co-chairs

Tzu-Yang Yu, University of Massachusetts Lowell (United States)
Andrew L. Gyekenyesi, Ohio Aerospace Institute (United States)
H. Felix Wu, University of North Texas (United States)

Conference Program Committee

Ralf B. Bergmann, Bremer Institut für angewandte Strahltechnik GmbH (Germany)
Genda Chen, Missouri University of Science and Technology (United States)
Shen-En Chen, The University of North Carolina at Charlotte (United States)
Mohammed M. Ettouney, Weidlinger Associates, Inc. (United States)
Valery F. Godinez-Azcuaga, Shaw Pipeline Services (United States)
Nenad Gucunski, Rutgers, The State University of New Jersey (United States)
Dryver R. Huston, The University of Vermont (United States)
Xiaoning Jiang, North Carolina State University (United States)
Simon Laflamme, Iowa State University (United States)
Denvid Lau, City University of Hong Kong (Hong Kong, China)
Kenneth J. Loh, University of California, Davis (United States)
Jerome P. Lynch, University of Michigan (United States)
Theodoros E. Matikas, University of Ioannina (Greece)
Oliver J. Myers, Clemson University (United States)
Piotr Omenzetter, University of Aberdeen (United Kingdom)
Didem Ozevin, University of Illinois at Chicago (United States)

Akira Sasamoto, National Institute of Advanced Industrial Science and Technology (Japan)
Caesar Singh, U.S. Department of Transportation (United States)
Yu-Min Su, National Kaohsiung University of Applied Sciences (Taiwan)
Yan Wan, University of North Texas (United States)
Ming L. Wang, Northeastern University (United States)
Xingwei Wang, University of Massachusetts Lowell (United States)
Yang Wang, Georgia Institute of Technology (United States)
Fan Wu, Shanghai Jiao Tong University (China)
Tian Xia, The University of Vermont (United States)
Lingyu Yu, University of South Carolina (United States)
Fuh-Gwo Yuan, North Carolina State University (United States)
Paul H. Ziehl, University of South Carolina (United States)

Session Chairs

Keynote Session I
Peter J. Shull, The Pennsylvania State University (United States)

1 SHM/NDE for Composite Materials I
Simon Laflamme, Iowa State University (United States)
Denvid Lau, City University of Hong Kong (Hong Kong, China)

2 SHM/NDE for Composite Materials II
Simon Laflamme, Iowa State University (United States)
Denvid Lau, City University of Hong Kong (Hong Kong, China)

3 SHM/NDE for Composite Materials III
Simon Laflamme, Iowa State University (United States)
Denvid Lau, City University of Hong Kong (Hong Kong, China)

Keynote Session II
Peter J. Shull, The Pennsylvania State University (United States)
Tzu Yang Yu, University of Massachusetts Lowell (United States)

4 Bridge Inspection and Monitoring Using SHM/NDE Techniques I
Genda Chen, Missouri University of Science and Technology (United States)
Lingyu Yu, University of South Carolina (United States)

5 Bridge Inspection and Monitoring Using SHM/NDE Techniques II
Genda Chen, Missouri University of Science and Technology (United States)
Lingyu Yu, University of South Carolina (United States)

6 Piezoelectric Sensing SHM/NDE Technologies I
Denvid Lau, City University of Hong Kong (Hong Kong, China)
Tian Xia, The University of Vermont (United States)

7 Modeling and Simulation Techniques For SHM/NDE I
Piotr Omenzetter, University of Aberdeen (United Kingdom)
Didem Ozevin, University of Illinois at Chicago (United States)

8 Modeling and Simulation Techniques For SHM/NDE II
Piotr Omenzetter, University of Aberdeen (United Kingdom)
Denvid Lau, City University of Hong Kong (Hong Kong, China)

9 Modeling and Simulation Techniques for SHM/NDE III
Andrew L. Gyekenyesi, Ohio Aerospace Institute (United States)
Peter J. Shull, The Pennsylvania State University (United States)

10 Vibration-Based SHM/NDE I
Didem Ozevin, University of Illinois at Chicago (United States)

11A Panel Discussion: Challenges and Opportunities for Infrastructure Inspection, Monitoring, and Repair
Tzuyang Yu, University of Massachusetts Lowell (United States)
Dryver R. Huston, The University of Vermont (United States)

11B Guided Wave I
Nenad Gucunski, Rutgers, The State University of New Jersey (United States)
Dryver R. Huston, The University of Vermont (United States)

12A SHM/NDE for Civil Infrastructure I
Zhenhua Huang, University of North Texas (United States)
Kaoshan Dai, Tongji University (China)

12B Guided Wave II
Nenad Gucunski, Rutgers, The State University of New Jersey (United States)
Dryver R. Huston, The University of Vermont (United States)

13A SHM/NDE for Civil Infrastructure II
Zhenhua Huang, University of North Texas (United States)
Kaoshan Dai, Tongji University (China)

13B Guided Wave III
Ming Wang, Northeastern University (United States)
Xiaoning Jiang, North Carolina State University (United States)

14A Roadway and Pavement Inspection and Monitoring: SHM/NDE Technologies
Ming Wang, Northeastern University (United States)
Yu-Min Su, National Kaohsiung University of Applied Sciences (Taiwan)

14B Radar and Microwave NDE Technologies
Tzu Yang Yu, University of Massachusetts Lowell (United States)
Dryver R. Huston, The University of Vermont (United States)
