1198601 · © 2022 SPIE · 0277-786X · doi: 10.1117/12.2635645

Proc. of SPIE Vol. 11986 1198601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Real-time Measurements, Rogue Phenomena, and Single-Shot Applications VII*, edited by Daniel R. Solli, Georg Herink, Serge Bielawski, Proc. of SPIE 11986, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NONLINEAR DYNAMICS, SOLITONS, AND ROGUES WAVES

- 11986 02 **Cage solitons (Invited Paper)** [11986-2]
- 11986 03 **Experimental investigation of spontaneous and seeded modulation instability competition: route to the thermalization of the Fermi Pasta Ulam Tsingou recurrences** [11986-4]
- 11986 04 **Simulating the polarization dynamics of ultrafast solitons** [11986-7]

REAL-TIME SPECTROSCOPY AND ULTRAFAST MEASUREMENTS

- 11986 05 **Terabit sampling system with photonic time-stretch analog-to-digital converter (Invited Paper)** [11986-9]
- 11986 06 **Rapid and high-sensitivity measurements of broadband optical activity with interferometric Fourier-transform balanced detection (Invited Paper)** [11986-10]
- 11986 07 **Nonlinear aberrations in time lenses** [11986-14]

Conference Committee

Symposium Chairs

Craig B. Arnold, Princeton University (United States)
Takunori Taira, Institute for Molecular Science (Japan)
Stefan Kaierle, Laser Zentrum Hannover e.V. (Germany)
John M. Ballato, Clemson University (United States)

Program Track Chairs

Vladimir Ilchenko, Jet Propulsion Laboratory (United States)
Paul O. Leisher, Freedom Photonics, LLC (United States)

Conference Chairs

Daniel R. Solli, University of California, Los Angeles (United States)
Georg Herink, University Bayreuth (Germany)
Serge Bielawski, Laboratoire de Physique des Lasers, Atomes et Molécules (France)

Conference Program Committee

Nail N. Akhmediev, The Australian National University (Australia)
John M. Dudley, Institut Franche-Comte Electronique Mecanique Thermique et Optique (France)
Moti Fridman, Bar-Ilan University (Israel)
Hideaki Furukawa, National Institute of Information and Communications Technology (Japan)
Goëry Genty, Tampere University (Finland)
Takuro Ideguchi, The University of Tokyo (Japan)
Bahram Jalali, University of California, Los Angeles (United States)
Dario Polli, Politecnico di Milano (Italy)
William Renninger, The Institute of Optics, University of Rochester (United States)
Claus Ropers, Georg-August-Univ. Göttingen (Germany)
Günter Steinmeyer, Max-Born-Institut für Nichtlineare Optik und Kurzzeitspektroskopie (Germany)
Pierre Suret, Laboratoire de Physique des Lasers, Atomes et Molécules (France)
Masayuki Suzuki, Doshisha University (Japan)
Abdelmajid Taki, Laboratoire de Physique des Lasers, Atomes et Molécules (France)
Giovanna Tissoni, Institut de Physique de Nice (France)
