SPIE

Volume 12392

Proceedings of SPIE, 1605-7422, V. 12392

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Advanced Chemical Microscopy for Life Science and Translational Medicine 2023, edited by
Ji-Xin Cheng, Wei Min, Garth J. Simpson, Proc. of SPIE Vol. 12392, 1239201
© 2023 SPIE · 1605-7422 · doi: 10.1117/12.2678578

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Advanced Chemical Microscopy for Life Science and Translational Medicine 2023*, edited by Ji-Xin Cheng, Wei Min, Garth J. Simpson, Proc. of SPIE 12392, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

IR PHOTOTHERMAL MICROSCOPY

12392 02 **Functional live-cell mid-infrared microscopy and spectroscopy by optoacoustic and optothermal detection (Invited Paper)** [12392-2]

12392 03 **Widefield infrared photothermal imaging and spectroscopy** [12392-6]

CLINICAL TRANSLATION

12392 04 **Imaging radiobiological response of breast cancer cells in vitro using stimulated Raman scattering** [12392-16]

12392 05 **The clinical transferability of Raman micro-spectroscopic systems for cervical cytopathology** [12392-19]

NEW DEVELOPMENT OF RAMAN MICROSCOPY

12392 06 **Quantum-enhanced stimulated Raman scattering microscopy toward breaking the shot noise limit in high-power regime** [12392-25]

IR MICROSCOPY

12392 07 **Widefield mid-infrared photothermal heterodyne imaging in the cell-silent window (Invited Paper)** [12392-34]

RAMAN BIOMEDICAL APPLICATION

12392 08 **Characterization of lipid composition and localization at different stages of nonalcoholic fatty liver disease using stimulated Raman scattering microscopy** [12392-44]

DATA SCIENCE II

12392 09 **Image processing as basis for chemometrics in photothermal atomic force microscopy infrared imaging (Invited Paper) [12392-45]**

VOLUMETRIC COHERENT RAMAN SCATTERING IMAGING

12392 0A **Three-dimensional analysis of water dynamics in human skin by stimulated Raman scattering imaging [12392-49]**

INNOVATION AND COMMERCIALIZATION OF VIBRATIONAL MICROSCOPY

12392 0B **Metasurface-enhanced infrared reflection chemical imaging on live and fixed cells with a QCL microscope [12392-53]**

POSTER SESSION

12392 0C **Blind hyperspectral unmixing of pump-probe images with maximum likelihood selection of a convolutional network from an ensemble of models [12392-62]**

DIGITAL POSTER SESSION

12392 0D **Feasibility study of Raman spectroscopy in corneal stromal tissue of human myopic eye [12392-59]**

12392 0E **Raman spectra-based structural classification analysis of flavone and isoflavone [12392-60]**

Conference Committee

Symposium Chairs

Sergio Fantini, Tufts University (United States)
Paola Taroni, Politecnico di Milano (Italy)

Symposium Co-chairs

Jennifer K. Barton, The University of Arizona (United States)
Wolfgang Drexler, Medizinische Universität Wien (Austria)

Program Track Chairs

Ammasi Periasamy, University of Virginia (United States)
Daniel L. Farkas, University of Southern California (United States)
and SMI (United States)

Conference Chairs

Ji-Xin Cheng, Boston University (United States)
Wei Min, Columbia University (United States)
Garth J. Simpson, Purdue University (United States)

Conference Program Committee

Rohit Bhargava, University of Illinois (United States)
Stephen A. Boppart, University of Illinois (United States)
Sophie Brasselet, Institut Fresnel (France)
Minhaeng Cho, Korea University (Korea, Republic of)
Marcus T. Cicerone, Georgia Institute of Technology (United States)
Hilton B. de Aguiar, Ecole Normale Supérieure (France)
Conor L. Evans, Wellman Center for Photomedicine (United States)
Hanieh Fattahi, Max-Planck-Institut für Quantenoptik (Germany)
Dan Fu, University of Washington (United States)
Katsumasa Fujita, Osaka University (Japan)
Wei E. Huang, University of Oxford (United Kingdom)
Zhiwei Huang, National University of Singapore (Singapore)
Minbiao Ji, Fudan University (China)
Anita Mahadevan-Jansen, Vanderbilt University (United States)
Julian Moger, University of Exeter (United Kingdom)
Yasuyuki Ozeki, The University of Tokyo (Japan)
Sapun H. Parekh, The University of Texas at Austin (United States)
Ammasi Periasamy, University of Virginia (United States)
Miguel A. Pleitez, Helmholtz Zentrum München GmbH (Germany)

Dario Polli, Politecnico di Milano (Italy)
Jürgen Popp, Leibniz-Institut für Photonische Technologien e.V.
(Germany)
Eric O. Potma, University of California, Irvine (United States)
Rohith K. Reddy, University of Houston (United States)
Hervé Rigneault, Institut Fresnel (France)
Lingyan Shi, University of California, San Diego (United States)
Chi-Kuang Sun, National Taiwan University (Taiwan)
Meng Wang, Baylor College of Medicine (United States)
Warren S. Warren, Duke University (United States)
Jesse W. Wilson, Colorado State University (United States)
Xiaoliang Sunney Xie, Peking University (China)
Xiaoji G. Xu, Lehigh University (Canada)
Shuhua Yue, Beihang University (China)
