

Medical Imaging 2023

Computer-Aided Diagnosis

**Khan M. Iftekharruddin
Weijie Chen**
Editors

**19–23 February 2023
San Diego, California, United States**

Sponsored by
SPIE

Cosponsored by
Siemens Healthcare/Healthineers

Cooperating Organizations
American Association of Physicists in Medicine (United States)
Radiological Society of North America
World Molecular Imaging Society
Society for Imaging Informatics in Medicine (United States)
International Foundation for Computer Assisted Radiology and Surgery
Medical Image Perception Society (United States)

Published by
SPIE

Volume 12465

Proceedings of SPIE, 1605-7422, V. 12465

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Medical Imaging 2023: Computer-Aided Diagnosis, edited by Khan M. Iftekharruddin,
Weijie Chen, Proc. of SPIE Vol. 12465, 1246501 · © 2023 SPIE
1605-7422 · doi: 10.1117/12.2682118

Proc. of SPIE Vol. 12465 1246501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Medical Imaging 2023: Computer-Aided Diagnosis*, edited by Khan M. Iftikharuddin, Weijie Chen, Proc. of SPIE 12465, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Conference Committee*

NEUROLOGY

- 12465 03 **Normative modeling using multimodal variational autoencoders to identify abnormal brain volume deviations in Alzheimer's disease** [12465-1]
- 12465 04 **Unsupervised learning of healthy anatomy for anomaly detection in brain CT scans** [12465-2]
- 12465 05 **From adult to pediatric: deep learning-based automatic segmentation of rare pediatric brain tumors** [12465-3]
- 12465 06 **Bi-modal network combining convolutional neural network and TabNet, differentiating spinal tumors based on images and clinical risk factors** [12465-4]

RADIOMICS, RADIOGENOMICS, AND MULTI-OMICS

- 12465 07 **Novel integration of radiomics and deep transfer learning for diagnosis of indeterminate thyroid nodules on ultrasound** [12465-5]
- 12465 08 **MultiComBat: ComBat harmonization of multiple batch variables** [12465-6]
- 12465 0A **Classification of schizophrenia using large-scale kernelized Granger causality (lsKGC) and functional MR imaging** [12465-8]
- 12465 0B **Anterior cruciate ligament classification in knee MRI using automated pseudo-masking** [12465-9]

COVID-19

- 12465 0C **A radiomics-based model for the outcome prediction in COVID-19 positive patients through deep learning with both longitudinal chest x-ray and chest computed tomography images** [12465-10]
- 12465 0D **Improved method for COVID-19 classification of complex-architecture CNN from chest CT volumes using orthogonal ensemble networks** [12465-11]
- 12465 0E **Linking CT and SPECT based analysis for quantitative follow-up of vascular perfusion defects in COVID-19** [12465-12]

- 12465 OF **Assessing robustness of a deep-learning model for COVID-19 classification on chest radiographs** [12465-13]
- 12465 OH **Federated learning using multi-institutional data for generalizable chest x-ray diagnosis** [12465-15]

BREAST

- 12465 OI **Multi-view DBT grid-attention detection framework** [12465-16]
- 12465 OJ **Developing a task-oriented deep convolutional neural network application towards estimating near-term breast cancer risk: preliminary work** [12465-17]
- 12465 OK **End-to-end mammographic breast density quantification with deep learning: preliminary study on simulated mammograms** [12465-18]
- 12465 OL **Quantitative ultrasound radiomics for monitoring radiation-induced toxicity following breast radiotherapy** [12465-19]

NOVEL APPLICATIONS

- 12465 OM **Identification of autism spectrum disorder based on MEWISPool and multi-modal learning** [12465-20]
- 12465 ON **Deep-learning-based automatic segmentation of the placenta and uterine cavity on prenatal MR images** [12465-21]
- 12465 OO **Automated classification of intravenous contrast enhancement phase of CT scans using residual networks** [12465-22]
- 12465 OP **Deep regression model with ordinal and triplet loss for the prediction of prostate cancer aggressiveness in multi-parametric MR images** [12465-23]
- 12465 OQ **Opioid use disorder prediction using machine learning of fMRI data** [12465-24]

AI: JOINT SESSION WITH CONFERENCES 12465 AND 12467

- 12465 OR **Assessing an AI-based smart imagery framing and truthing (SIFT) system to assist radiologists annotating lung abnormalities on chest x-ray images for development of deep learning models** [12465-25]
- 12465 OS **How does image quality affect computer-aided diagnosis of colorectal polyps?** [12465-26]
- 12465 OT **Automated right coronary artery localizer using deep learning for optimal cardiac phase selection** [12465-27]

DEEP LEARNING I

- 12465 0V **Class activation mapping and uncertainty estimation in multi-organ segmentation** [12465-28]
- 12465 0W **Non-invasive classification of IDH mutation status of gliomas from multi-modal MRI using a 3D convolutional neural network** [12465-29]
- 12465 0X **Siam-VAE: a hybrid deep learning based anomaly detection framework for automated quality control of head CT scans** [12465-30]
- 12465 0Y **Classification of point-of-care ultrasound in breast imaging using deep learning** [12465-51]

EYE AND RETINA

- 12465 0Z **A vision-GNN framework for retinopathy classification using optical coherence tomography** [12465-32]
- 12465 10 **Shape-based segmentation of retinal layers and fluids in OCT image data** [12465-33]
- 12465 11 **Overcoming the sensor delta for semantic segmentation in OCT images** [12465-34]
- 12465 12 **Correcting class imbalances with self-training for improved universal lesion detection and tagging** [12465-35]
- 12465 13 **Multi-label ocular abnormalities detection with semantic dictionary learning** [12465-36]

SEGMENTATION

- 12465 14 **Fully automated aortic measurements via CNN-based joint segmentation and localization** [12465-37]
- 12465 15 **Drusen segmentation in color fundus photographs for drusenoid pigment epithelial detachment patients based on ground-truth derived from SD-OCTs** [12465-38]
- 12465 16 **Can multiple segmentation methods enhance deep learning networks generalization? A novel hybrid learning paradigm** [12465-39]
- 12465 17 **Improved ascites segmentation with bladder identification using anatomical location residual U-Net** [12465-40]
- 12465 18 **MISS-tool: medical image segmentation synthesis tool to emulate segmentation errors** [12465-41]
- 12465 19 **Automated detection method of thoracic aorta calcification from non-contrast CT images using mediastinal anatomical label map** [12465-42]

HEAD, NECK, AND MUSCULOSKELETAL

- 12465 1A **Audio-visual feature fusion for improved thoracic disease classification** [12465-43]
- 12465 1B **Unsupervised anomaly detection of paranasal anomalies in the maxillary sinus** [12465-44]
- 12465 1C **Predicting the need for a replan in oropharyngeal cancer: a radiomic, clinical, and dosimetric model** [12465-45]
- 12465 1D **Towards fracture risk assessment by deep-learning-based classification of prevalent vertebral fractures** [12465-46]

DEEP LEARNING II

- 12465 1E **Universal lymph node detection in multiparametric MRI with selective augmentation** [12465-47]
- 12465 1F **3D patch-based CNN for fissure segmentation on CT images to quantitatively assess fissure integrity and evaluate emphysema patients for endobronchial valve treatment** [12465-48]
- 12465 1G **Effect of domain-specific self-supervised pretraining on predictive uncertainty for colorectal polyp characterization** [12465-49]
- 12465 1H **Decision region analysis to deconstruct the subgroup influence on AI/ML predictions** [12465-50]
- 12465 1I **Probabilistic 3D segmentation for aleatoric uncertainty quantification in full 3D medical data** [12465-31]

LUNG AND ABDOMEN

- 12465 1J **CT-HARMONICA: physics-based CT harmonization for reliable lung density quantification** [12465-52]
- 12465 1K **Gate-SBNet: gate semantic boundary network for colorectal polyp segmentation** [12465-53]
- 12465 1L **RUPNet: residual upsampling network for real-time polyp segmentation** [12465-54]
- 12465 1M **Fully automated cascaded approach for renal mass detection on T2 weighted MRI images** [12465-55]
- 12465 1N **Deep learning for improved polyp detection from synthetic narrow-band imaging** [12465-56]
- 12465 1O **No nodule left behind: evaluating lung nodule malignancy classification with different stratification schemes** [12465-57]

POSTER SESSION

- 12465 1P **Real-time Barrett's neoplasia characterization in NBI videos using an int8-based quantized neural network (Computer-Aided Diagnosis Best Paper Award) [12465-58]**
- 12465 1Q **Automatic characterization of liver tumors from multi-phase CT images [12465-59]**
- 12465 1R **Abdominal CT pancreas segmentation using multi-scale convolution with aggregated transformations [12465-60]**
- 12465 1S **Improving small lesion segmentation in CT scans using intensity distribution supervision: application to small bowel carcinoid tumor [12465-61]**
- 12465 1T **Catheter segmentation in chest x-ray: improving imbalanced segmentation with a class frequency weighted loss function [12465-62]**
- 12465 1U **Machine reasoning for segmentation of the kidneys on CT images: improving CNN performance by incorporating anatomical knowledge in post-processing [12465-63]**
- 12465 1V **Deep learning with visual explanation for radiotherapy-induced toxicity prediction [12465-64]**
- 12465 1W **Deep learning-based lung segmentation and automatic regional template in chest x-ray images for pediatric tuberculosis [12465-65]**
- 12465 1X **Improving segmentation of calcified and non-calcified plaques on CCTA-CPR scans via masking of the artery wall [12465-66]**
- 12465 1Y **A deep learning method for localizing the origin of ventricular tachycardia using 12-lead ECG [12465-67]**
- 12465 1Z **Prediction of hematoma expansion using a random forest model with clinical data of patients with intracerebral hemorrhage [12465-68]**
- 12465 20 **An MRI-based radiomics signatures for overall survival prediction of gliomas patients [12465-69]**
- 12465 21 **Open-source tool for model performance analysis for subpopulations [12465-70]**
- 12465 22 **Explainable AI for COVID-19 prognosis from early chest x-ray and clinical data in the context of the COVID-CXR international hackathon [12465-71]**
- 12465 23 **Prostate Gleason score prediction via MRI using capsule network [12465-72]**
- 12465 24 **Tensor based multi-modality fusion for prediction of postoperative early recurrence of single hepatocellular carcinoma [12465-73]**
- 12465 25 **Topological prediction models for relapse of stage I patients with non-small cell lung cancer prior to stereotactic ablative radiotherapy [12465-74]**

- 12465 26 **Artificial intelligence for image-based breast cancer risk prediction using attention** [12465-76]
- 12465 27 **Barrett's lesion detection using a minimal integer-based neural network for embedded systems integration** [12465-77]
- 12465 29 **The importance of data domain on self-supervised learning for brain metastasis detection and segmentation** [12465-79]
- 12465 2A **Breast mass characterization using sparse approximations of patch-sampled deep features** [12465-81]
- 12465 2B **An analysis of intensity harmonization techniques for Parkinson's multi-site MRI datasets** [12465-82]
- 12465 2C **Radiomics analysis to diagnose tumor invasiveness of pulmonary sub-solid nodules from longitudinal pre-surgical CT scans** [12465-83]
- 12465 2E **Iterative K-means clustering for disease subtype discovery** [12465-85]
- 12465 2F **Glaucoma classification using a morphological-convolutional neural network trained with extreme learning machine** [12465-86]
- 12465 2H **Improving medical image segmentation and classification using a novel joint deep learning model** [12465-88]
- 12465 2J **Developing a breast lesion simulator and remover in mammograms using Cycle-GAN: focusing on its impacts on a computer aided detection algorithm** [12465-91]
- 12465 2L **NesT UNet: pure transformer segmentation network with an application for automatic cardiac myocardial infarction evaluation** [12465-93]
- 12465 2M **Clinical segmentation for improved pancreatic ductal adenocarcinoma detection and segmentation** [12465-94]
- 12465 2N **A volumetric multi-head attention strategy for lung nodule classification in CT** [12465-96]
- 12465 2O **Segmentation of mouse tibia on MRI using deep learning U-Net models** [12465-97]
- 12465 2P **Predicting obstructive sleep apnea severity from craniofacial images using ensemble machine learning models** [12465-98]
- 12465 2R **Using virtual monoenergetic images in Karhunen–Loève domain to differentiate lesion pathology** [12465-100]
- 12465 2S **An investigation on energy spectral information of computed tomography for machine learning in lesion classification** [12465-101]
- 12465 2T **Classification of high-risk coronary plaques using radiomic analysis of multi-energy photon-counting-detector computed tomography (PCD-CT) images** [12465-102]
- 12465 2U **Predicting future multiple sclerosis disease progression from MR scans** [12465-103]

- 12465 2V **Multi-view based computer-aided model with anatomical position prior for architectural distortion detection in digital breast tomosynthesis** [12465-104]
- 12465 2W **Automatic segmentation of stroke lesions in T1-weighted magnetic resonance images with convolutional neural networks** [12465-105]
- 12465 2X **Volumetric corpus callosum segmentation integrated to inCCsight software for supporting DTI-based studies** [12465-106]
- 12465 2Y **Radiomics-based classification of autosomal dominant polycystic kidney disease (ADPKD) Mayo imaging classification (MIC) and the effect of gray-level discretization** [12465-107]
- 12465 2Z **An analytic, physics-based approach to scoring emphysema in lung CT patients** [12465-108]
- 12465 30 **Renal parenchyma segmentation based on a cascaded self-adaptive framework with local context-aware mix-up regularization in abdominal MR images** [12465-109]
- 12465 31 **Cross modal global local representation learning from radiology reports and x-ray chest images** [12465-110]
- 12465 32 **Bladder cancer segmentation using U-Net-based deep-learning** [12465-111]
- 12465 33 **Bladder cancer treatment response assessment in CT urography by using deep-learning and radiomics** [12465-112]
- 12465 34 **Classification of COVID-19 cases from chest CT volumes using hybrid model of 3D CNN and 3D MLP-mixer** [12465-113]
- 12465 35 **A 2D U-NET combined model based on lesion size for automated stroke lesion segmentation** [12465-114]
- 12465 36 **Medical knowledge-guided deep learning for mammographic breast density classification** [12465-115]
- 12465 37 **A hybrid model of deep learning features and clinical features for severe cases predication of COVID-19** [12465-116]
- 12465 38 **3D universal lesion detection and tagging in CT with self-training** [12465-117]
- 12465 39 **Recognition of tooth numbers and conditions on dental panoramic radiographs for assisting dental chart filing** [12465-118]
- 12465 3A **Survival prediction for patients with metastatic urothelial cancer after immunotherapy using machine learning** [12465-119]

DIGITAL POSTER SESSION

- 12465 3B **Towards a relation extractor U-shaped network for accurate pulmonary vessel segmentation in CT images** [12465-75]
- 12465 3C **Densely encoded attention networks for accurate retinal layers segmentation in optical coherence tomography** [12465-80]
- 12465 3D **Using temporal GAN to translate the current CTP scan to follow-up MRI, for predicting final acute ischemic stroke lesions** [12465-90]

Conference Committee

Symposium Chairs

Robert M. Nishikawa, University of Pittsburgh (United States)
Despina Kontos, Penn Medicine (United States)

Conference Chairs

Khan M. Iftikharuddin, Old Dominion University (United States)
Weijie Chen, U.S. Food and Drug Administration (United States)

Conference Program Committee

Sameer K. Antani, U.S. National Library of Medicine (United States)
Samuel G. Armato III, The University of Chicago (United States)
Susan M. Astley, The University of Manchester (United Kingdom)
Ulas Bagci, Northwestern University (United States)
Esther E. Bron, Erasmus MC (Netherlands)
Matthew S. Brown, UCLA Center for Computer Vision & Imaging Biomarkers (United States)
Kenny H. Cha, U.S. Food and Drug Administration (United States)
Heang-Ping Chan, University of Michigan (United States)
Thomas M. Deserno, Technische Universität Braunschweig (Germany)
Karen Drukker, The University of Chicago (United States)
Jan Ehrhardt, Universität zu Lübeck (Germany)
Catalin Fetita, Télécom SudParis (France)
Aimilia Gastounioli, Penn Medicine (United States)
Maryellen L. Giger, The University of Chicago (United States)
Hayit Greenspan, Tel Aviv University (Israel)
Lubomir M. Hadjiiski, University of Michigan (United States)
Horst K. Hahn, Fraunhofer MEVIS (Germany) and Jacobs University Bremen (Germany)
Takeshi Hara, Gifu University School of Medicine (Japan)
Helen Hong, Seoul Women's University (Korea, Republic of)
JongHyo Kim, Seoul National University Hospital (Korea, Republic of)
Despina Kontos, Penn Medicine (United States)
Juhun Lee, University of Pittsburgh (United States)
Zhengrong Jerome Liang, Stony Brook University (United States)
Marius George Linguraru, Children's National Medical Center (United States)
Hongbing Lu, PLA Air Force Military Medical University (China)
Maciej A. Mazurowski, Duke University (United States)
Fabrice Meriaudeau, Université de Bourgogne (France)
Kensaku Mori, Nagoya University (Japan)

Chisako Muramatsu, Shiga University (Japan)
Janne J. Näppi, Massachusetts General Hospital (United States) and
Harvard Medical School (United States)
Carol L. Novak, Siemens Healthineers (United States)
Nicholas A. Petrick, U.S. Food and Drug Administration (United States)
Antonio R. Porras, Children's National Health System (United States)
Prateek Prasanna, Stony Brook University (United States)
Letícia Rittner, University of Campinas (Brazil)
Ravi K. Samala, U.S. Food and Drug Administration (United States)
Clarisa I. Sánchez-Gutiérrez, University of Amsterdam (Netherlands)
Ronald M. Summers, National Institutes of Health Clinical Center
(United States)
Kenji Suzuki, Tokyo Institute of Technology (Japan)
Jonas Teuwen, Netherlands Cancer Institute (Netherlands) and
Radboud University Medical Center (Netherlands)
Pallavi Tiwari, University of Wisconsin-Madison (United States)
Axel Wismüller, University of Rochester Medical Center (United States)
Shandong Wu, University of Pittsburgh (United States)
Xiaofeng Yang, Emory University School of Medicine (United States)
Hiroyuki Yoshida, Massachusetts General Hospital (United States) and
Harvard Medical School (United States)
Chuan Zhou, Michigan Medicine (United States)
