Volume 12950

Proceedings of SPIE 0277-786X, V. 12950

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Nondestructive Characterization and Monitoring of Advanced Materials, Aerospace, Civil Infrastructure, and Transportation XVIII, edited by Andrew L. Gyekenyesi, Peter J. Shull, H. Felix Wu, Tzuyang Yu, Proc. of SPIE Vol. 12950, 1295001 · © 2024 SPIE · 0277-786X · doi: 10.1117/12.3033648

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Nondestructive Characterization and Monitoring of Advanced Materials, Aerospace, Civil Infrastructure, and Transportation XVIII*, edited by Andrew L. Gyekenyesi, Peter J. Shull, H. Felix Wu, Tzuyang Yu, Proc. of SPIE 12950, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SESSION 1 NDE OF ADVANCED MATERIALS I

12950 02 **A recyclable self-healing composite with advanced sensing property** [12950-1]

12950 03 **Assessment of segmentation-induced deviations of porosity metrics in powder bed fusion additively manufactured components** [12950-2]

12950 04 **Determining a number of x-ray shots for inspection of welds in cylindrical parts** [12950-4]

12950 05 **Enhancing electromechanical properties of a lignin-based multifunctional composite through chemical reactive blending with functionalized carbon nanotubes** [12950-5]

SESSION 2 SHM/NDE OF TRANSPORTATION INFRASTRUCTURE I

12950 06 **Estimation of compressive strength of Portland cement concrete using synthetic aperture radar, ultrasonic testing, and rebound hammer** [12950-8]

12950 07 **Application of remote ground-penetrating radar for condition assessment of wooden crossties** [12950-9]

SESSION 3 NDE OF ADVANCED MATERIALS II

12950 08 **LSTM-based fatigue monitoring of fiberglass composites using laser-induced graphene** [12950-11]

12950 09 **Applicability of carbon nanotube-incorporated cement-based composites as a sensor for measuring the carbonation front: an overview** [12950-14]

12950 0A **Elastic wave propagation in polycrystalline materials at different texture intensities** [12950-15]

12950 0B **Off-axis digital image correlation using projected speckles for damage imaging with minimal surface preparation** [12950-36]

SESSION 4 COMPUTATIONAL DATA ANALYSIS I

12950 0C **Real-time state estimation using recurrent neural network and topological data analysis** [12950-17]

12950 0D **GPU-accelerated data-driven framework of hybrid ReaxFF** [12950-18]

12950 0E **Physics-informed neural networks for inverse problems in structural dynamics** [12950-19]

SESSION 5 ULTRASONIC TECHNOLOGIES

12950 0F **Development of elastic wave analyzer for icy sub-surfaces (EWAIS) in water-bearing worlds** [12950-21]

12950 0G **The impact of underwater acoustic noise using conventional and shear-horizontal sensor in acoustic emission testing** [12950-24]

SESSION 6 COMPUTATIONAL DATA ANALYSIS II

12950 0H **Pedestrian footstep localization using a deep convolutional network for time difference of arrival estimation** [12950-27]

12950 0I **Detection of cracking mechanism transition on reinforced concrete shear walls using graph theory** [12950-28]

12950 0J **Automated AI-DIC marker-less technique for tracking displacements of large structures** [12950-29]

12950 0K **Building health monitoring with different thermal infrared cameras** [12950-30]

SESSION 7 SHM/NDE OF TRANSPORTATION INFRASTRUCTURE II

12950 0L **Corrosion detection of steel-reinforced concrete specimens using synthetic aperture radar** [12950-31]

12950 0M **Multi-scale robotic scanning of surface cracks in concrete structures** [12950-35]

SESSION 8 NDE OF ADVANCED MATERIALS III

12950 0N **Multiscale modeling-enabled design of multifunctional composites** [12950-37]

12950 0O **Investigating the mechanical failure mechanisms of a novel CFRP composite to inform computational models** [12950-38]

12950 0P **Heat transfer analysis through hybrid FRP composite for self-sensing lithium-ion battery enclosure** [12950-39]

12950 0Q **Mapping surface stress of automotive glass by non-contact polarimetric scans** [12950-40]

SESSION 9 SHM/NDE OF TRANSPORTATION INFRASTRUCTURE III

12950 0R **Static and dynamic testing of 3D-printed beams for structural design and construction application** [12950-44]

12950 0S **Considerations for qualifying reliable eddy current array technique for detection of backwall cracks** [12950-51]

POSTER SESSION

12950 0T **Damage localization in large-area FRP composites using a parallel array of self-sensing carbon fiber tows** [12950-47]

12950 0U **Single image wire corrosion level identification using explainable AI** [12950-52]

DIGITAL POSTER SESSION

12950 0V **Evaluating damage progress in prestressed anchor cables with artificial defects using acoustic emission technology** [12950-10]

12950 0W **The evaluation of the seismic performance of the novel modularized footbridge pier** [12950-33]

12950 0X **Structural finite element modeling and static analysis of the bridge modular expansion joint under vehicle load** [12950-46]

Conference Committee

Symposium Chairs

Haiying Huang, The University of Texas at Arlington (United States)
Hani Naguib, University of Toronto (Canada)

Symposium Co-chairs

Asha Hall, DEVCOM Army Research Laboratory (United States)
Jae-Hung Han, KAIST (Korea, Republic of)

Conference Chair

Andrew L. Gyekenyesi, Ohio Aerospace Institute (United States)

Conference Co-chairs

Peter J. Shull, The Pennsylvania State University (United States)
H. Felix Wu, United States Department of Energy (United States)
Tzuyang Yu, University of Massachusetts Lowell (United States)

Conference Program Committee

Holger Böse, Fraunhofer Institute for Silicate Research (Germany)
Christopher C. Bowland, Oak Ridge National Laboratory (United States)
Genda Chen, Missouri University of Science and Technology (United States)
Chih-Hung Chiang, Chaoyang University of Technology (Taiwan)
Bill Davids, The University of Maine (United States)
Pei Dong, George Mason University (United States)
Reinhard Ebert, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
Benjamin L. Ervin, MIT Lincoln Laboratory (United States)
Jung-Wuk Hong, KAIST (Korea, Republic of)
Tsung-Chin Hou, National Cheng Kung University (Taiwan)
Dryver R. Huston, The University of Vermont (United States)
Xiaoning Jiang, North Carolina State University (United States)
Ajay M. Koshti, NASA Johnson Space Center (United States)
Simon Laflamme, Iowa State University of Science and Technology (United States)
Denvid Lau, City University of Hong Kong (Hong Kong, China)
Kenneth J. Loh, University of California, San Diego (United States)
Jerome P. Lynch, Duke University (United States)

Oliver J. Myers, Clemson University (United States)
Piotr Omenzetter, University of Aberdeen (United Kingdom)
Didem Ozevin, University of Illinois at Chicago (United States)
Akira Sasamoto, National Institute of Advanced Industrial Science and Technology (Japan)
Caesar Singh, U.S. Dept. of Transportation (United States)
Yu-Min Su, National Kaohsiung University of Science and Technology (Taiwan)
Jiong Tang, University of Connecticut (United States)
Edward Zhou, AECOM (United States)
