PROCEEDINGS OF SPIE

# *Quantum Information and Computation VII*

**Eric J. Donkor**
**Andrew R. Pirich**
**Howard E. Brandt**
*Editors*

**16–17 April 2009**
**Orlando, Florida, United States**

*Sponsored and Published by*
SPIE

**Volume 7342**

Proceedings of SPIE, 0277-786X, v. 7342

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:
Author(s), "Title of Paper," in *Quantum Information and Computation VII*, edited by Eric J. Donkor, Andrew R. Pirich, Howard E. Brandt, Proceedings of SPIE Vol. 7342 (SPIE, Bellingham, WA, 2009) Article CID Number.

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

# Contents

v *Conference Committee*

**SESSION 1 QUANTUM COMPUTATION I**

7342 02 **Practical quantum fault tolerance** [7342-01]
G. Gilbert, Y. S. Weinstein, MITRE (United States); V. Aggarwal, A. R. Calderbank, Princeton Univ. (United States)

7342 03 **A space-efficient quantum computer simulator suitable for high-speed FPGA implementation** [7342-02]
M. P. Frank, L. Oniciuc, U. H. Meyer-Baese, Florida State Univ. College of Engineering (United States); I. Chiorescu, National High Magnetic Field Lab. (United States)

7342 04 **The case for biological quantum computer elements** [7342-03]
W. Baer, Naval Postgraduate School (United States); R. Pizzi, Univ. of Milan (Italy)

**SESSION 2 QUANTUM COMPUTATION II**

7342 05 **Aspects of quantum computational geodesics** [7342-04]
H. E. Brandt, U.S. Army Research Lab. (United States)

7342 06 **Exploring entanglement in the context of quantum sensing** [7342-05]
J. M. Myers, T. T. Wu, Harvard Univ. (United States)

7342 08 **Riemann curvature in quantum computational geometry** [7342-07]
H. E. Brandt, U.S. Army Research Lab. (United States)

**SESSION 3 QUANTUM IMAGING**

7342 0A **Quantum entangled radar theory and a correction method for the effects of the atmosphere on entanglement** [7342-08]
J. F. Smith III, Naval Research Lab. (United States)

7342 0B **Quantum imaging: enhanced image formation using quantum states of light (Invited Paper)** [7342-09]
R. W. Boyd, K. W. C. Chan, A. Jha, M. Malik, C. O'Sullivan, H. Shin, P. Zerom, Univ. of Rochester (United States)

7342 0C **Topological quantum image analysis** [7342-10]
G. Chapline, J. L. DuBois, Lawrence Livermore National Lab. (United States)

**SESSION 4 QUANTUM MEASUREMENT AND SENSORS**

7342 0F **Measurement of a subsystem of a coupled quantum system** [7342-14]
M. Steiner, Inspire Institute (United States); M. Frey, Bucknell Univ. (United States); A. Gulian, Physics Arts Frontiers (United States); R. W. Rendell, A. K. Rajagopal, Inspire Institute (United States)

7342 0G **The post-selection probability current and its implications** [7342-16]
J. E. Gray, A. D. Parks, Naval Surface Warfare Ctr. Dahlgren (United States)

7342 0H **Sensing intruders using entanglement: a photonic quantum fence** [7342-17]
T. S. Humble, R. S. Bennink, W. P. Grice, Oak Ridge National Lab. (United States); I. J. Owens, Los Alamos National Lab. (United States)

7342 0I **Quantum sensor miniaturization prospectus** [7342-18]
G. Gilbert, M. Hamrick, Y. S. Weinstein, S. P. Pappas, A. Donadio, MITRE (United States)

**SESSION 5 QUANTUM INFORMATION THEORY**

7342 0J **An improved architecture of a realizable quantum computer for quantum programming languages** [7342-27]
N. Wu, Nanjing Univ. (China) and CUNY (United States); F. Song, Nanjing Univ. (China); X. Li, CUNY (United States)

7342 0L **Quantum algorithms for colored Jones polynomials** [7342-20]
L. H. Kauffman, Univ. of Illinois at Chicago (United States); S. J. Lomonaco, Jr., Univ. of Maryland, Baltimore County (United States)

7342 0M **Twisting of filamentary vortex solitons demarcated by fast Poincaré recursion** [7342-21]
J. Yepez, Air Force Research Lab. (United States); G. Vahala, The College of William & Mary (United States); L. Vahala, Old Dominion Univ. (United States)

7342 0N **Quantum Fisher information and the qudit depolarization channel** [7342-22]
M. Frey, Bucknell Univ. (United States); D. Collins, Mesa State College (United States)

7342 0O **The Fibonacci model and the Temperley-Lieb algebra** [7342-23]
L. H. Kauffman, Univ. of Illinois at Chicago (United States); S. J. Lomonaco, Jr., Univ. of Maryland, Baltimore County (United States)

7342 0P **Possible topological quantum computation via Khovanov homology: D-brane topological quantum computer** [7342-24]
M. Vélez, J. Ospina, EAFIT Univ. (Colombia)

7342 0R **Quantum informational representations of entangled fermions and bosons** [7342-28]
J. Yepez, Air Force Research Lab. (United States)

# Conference Committee

*Symposium Chair*

**Ray O. Johnson,** Lockheed Martin Corporation (United States)

*Symposium Cochair*

**Michael T. Eismann,** Air Force Research Laboratory (United States)

*Conference Chairs*

**Eric J. Donkor,** University of Connecticut (United States)
**Andrew R. Pirich,** ACP Consulting (United States)
**Howard E. Brandt,** Army Research Laboratory (United States)

*Program Committee*

**Chip B. Elliott,** BBN Technologies (United States)
**Michael J. Hayduk,** Air Force Research Laboratory (United States)
**Louis H. Kauffman,** University of Illinois at Chicago (United States)
**Vladimir E. Korepin,** Stony Brook University (United States)
**Samuel J. Lomonaco, Jr.,** University of Maryland, Baltimore County (United States)
**John M. Myers,** Harvard University (United States)
**Vladimir Privman,** Clarkson University (United States)
**Alexander V. Sergienko,** Boston University (United States)
**Tai Tsun Wu,** Harvard University (United States)

*Session Chairs*

1 Quantum Computation I
**Andrew R. Pirich,** ACP Consulting (United States)

2 Quantum Computation II
**Samuel J. Lomonaco, Jr.,** University of Maryland, Baltimore County (United States)
**Louis H. Kauffman,** University of Illinois at Chicago (United States)

3 Quantum Imaging
**John M. Myers,** Harvard University (United States)

4 Quantum Measurement and Sensors
**Eric J. Donkor,** University of Connecticut (United States)
**Michael J. Hayduk,** Air Force Research Laboratory (United States)

5 Quantum Information Theory
**Howard E. Brandt,** Army Research Laboratory (United States)
