Volume 12112

Proceedings of SPIE 0277-786X, V. 12112

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Polarization: Measurement, Analysis, and Remote Sensing XV, edited by David B. Chenault,
Meredith K. Kupinski, Proc. of SPIE Vol. 12112, 1211201 · © 2022 SPIE
0277-786X · doi: 10.1117/12.2644338

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Polarization: Measurement, Analysis, and Remote Sensing XV*, edited by David B. Chenault, Meredith K. Kupinski, Proc. of SPIE 12112, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 INSTRUMENTATION

12112 03 **Unique navigation solution utilizing sky polarization signatures** [12112-4]

SESSION 2 DOFP

12112 05 **Demosaicing DoFP imaging polarimeter data from non-conventional modulation strategies** [12112-5]

12112 06 **Simultaneous demosaicing and resolution enhancement of LWIR DoFP polarimeter data** [12112-6]

SESSION 3 PHENOMENOLOGY

12112 09 **MODTRAN7: a polarimetric extension of the MODTRAN6 radiometric atmospheric radiative transfer model (Invited Paper)** [12112-9]

12112 0A **Gray Spectralon polarized reflectance deviations from Lambertian** [12112-10]

12112 0B **Comparing thermal and polarization sensing modes in a LWIR imaging polarimeter (Invited Paper)** [12112-12]

12112 0C **PReMA: a new theoretical constraint to advance polarimetric remote sensing** [12112-13]

12112 0D **Extrapolating Mueller matrices from linear Stokes images** [12112-14]

12112 0E **Turning a commercial bright-field microscope into a precise polarization-sensitive imaging device** [12112-15]

12112 0F **Physics-based rendering: simulated Mueller matrix imaging** [12112-11]

SESSION 4 REMOTE SENSING

12112 0G **Drone-based polarization imaging for phenotyping peanut in response to leaf spot disease** [12112-21]

12112 0H **Learned satellite identification using low-resolution spectropolarimetry** [12112-17]

12112 0I **Polarimetric imaging of the ocean surface for satellite-based ocean color applications** [12112-18]

12112 0J **Vicarious spaceborne polarimetric camera calibration using solar power stations** [12112-19]

12112 0L **Near space demonstration of a compact LWIR spectro-polarimeter for ice cloud measurements** [12112-16]

12112 0M **Polarimetric image rendering capability of DIRSIG4** [12112-23]

12112 0N **Multispectral polarimetric imaging for urban material discrimination** [12112-22]

Conference Committee

Symposium Chairs

Augustus W. Fountain III, University of South Carolina (United States)
Teresa L. Pace, L3Harris Technologies, Inc. (United States)

Program Track Chair

Ann Marie Raynal, Sandia National Laboratories (United States)

Conference Chairs

David B. Chenault, Polaris Sensor Technologies, Inc. (United States)
Meredith K. Kupinski, The University of Arizona (United States)

Conference Program Committee

Sudhir Dahal, Thermo Fisher Scientific Inc. (United States)
Laura M. Eshelman , Polaris Sensor Technologies, Inc. (United States)
Michael G. Gartley, Rochester Institute of Technology (United States)
Viktor Gruev, University of Illinois at Urbana-Champaign (United States)
Michael W. Kudenov, North Carolina State University (United States)
Charles F. LaCasse, Sandia National Labs. (United States)
Bradley M. Ratliff, University of Dayton Research Institute (United States)
Joseph A. Shaw, Montana State University (United States)
J. Scott Tyo, UNSW Canberra (Australia)
